# Paper Trade Journal–Volume 152–Year 1968
# Index to feature articles

The articles listed below are cross-referenced for the convenience of users. Short items and news stories are not included in this index.

| | | ISSUE |
|---|---|---|
| **Alkaline pulping** | | |
| Application of computer control to kraft mill continuous digesters —Alexander H. Morris | p. 42 | Sept. 23 |
| Considerations in centralizing control of the recovery cycle —Ralph K. Johnson | p. 39 | April 8 |
| Cook's helper-a computer system for kraft batch digesters —R. L. Henderson | p. 42 | Jan. 8 |
| ESCO vertical digester has successful first year of operation —John C. W. Evans | p. 68 | Nov. 4 |
| Finns operate the world's first sawdust market pulp mill —K. E. Jernström and A. Lares | p. 34 | Dec. 23 |
| How continuous diffusion washing was developed and how it works —Gordon Rowlandson | p. 50 | July 15 |
| Instrumentation and control for Glatfelter's pulp mill expansion. —F. N. Carter | p. 36 | Dec. 23 |
| Kamyr and Pandia digesters come on stream at St. Helens —Jeremy P. J. Edwards | p. 38 | May 6 |
| New evaporators-scrubber systems improve kraft recovery process —I. S. Shah | p. 58 | March 18 |
| Pulp mill expansion completes three phase program at Glatfelter | p. 40 | Aug. 12 |
| Recovery of heat and chemicals from kraft furnace flue gases —I. S. Shah | p. 65 | March 11 |
| Recovery of pulping chemicals explored in depth at Helsinki —Erik Kihlman | p. 38 | July 8 |
| Trends in odor abatement from kraft mill recovery units —V. P. Owens | p. 52 | Aug. 12 |
| **Bleaching** | | |
| How continuous diffusion washing was developed and how it works —Gordon Rowlandson | p. 50 | July 15 |
| How "Kinetic Mixing can radically reduce pulp chlorination time —Herbert Freedman | p. 43 | Dec. 9 |
| Instrumentation and control for Glatfelter's pulp mill expansion —F. N. Carter | p. 36 | Dec. 23 |
| Progress in the development of pulp bleaching with oxygen —A. Robert, A. Viallet, P. Rerolle, J. P. Andreolety | p. 49 | Aug. 5 |
| Questions and answers on $O_2$/NaOH bleaching and its practicality —A. Robert, A. Viallet, P. Rerolle, J. P. Andreolety | p. 40 | Aug. 19 |
| **Board manufacturing** | | |
| Adjustable Dry Vat proves very successful for higher quality grades of paperboard | p. 60 | Oct. 14 |
| Adjustable felts offers on-the-fly cleaning and improved drainage —Charles G. Tewksbury | p. 40 | April 22 |
| Are fourdrinier table rolls on the way out? —John C. W. Evans | p. 28 | Dec. 30 |
| Basic considerations for design of paper machine air systems —W. K. Metcalfe | p. 55 | March 18 |
| Chemicals can improve drainage performance on the paper machine —W. H. Ellis and W. A. Foster | p. 34 | June 3 |
| Controlled moisture addition to moving webs by a roll system —C. C. Boggus and J. E. Taylor | p. 60 | Sept. 16 |
| Dielectric dryers can improve paper machine performance —Mark D. Preston | p. 41 | Jan. 22 |
| Drying performance upgraded with Madelein System —Leonard Wieselman | p. 44 | June 3 |
| European technical men meet to discuss multi-ply board —John C. W. Evans | p. 75 | May 13 |
| Factors to consider before purchasing new fourdrinier auxiliaries —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 66 | Oct. 7 |
| First Ultra-Formers in U.S. successful at Hoerner Waldorf —John C. W. Evans | p. 40 | Dec. 9 |
| Five hundred Venta-Nip presses attest to success of grooved rolls | p. 57 | Oct. 28 |
| Hi-I press works on technical and special papers at Fletcher —Jeremy P. J. Edwards | p. 46 | March 25 |
| How better pocket ventilation does improve profiles and capacity—I —M. Ericson and K-H. Anderson | p. 46 | Dec. 16 |
| How better pocket ventilation does improve profiles and capacity—II —M. Ericson and K-H. Anderson | p. 40 | Dec. 23 |
| How to plan the design and acquisition of a paper machine —J. Mardon, L. D. Mardon, J. Acford, R. E. Chamberlain | p. 36 | July 29 |
| How to select and specify a new fourdrinier section and components | | |

| | | ISSUE |
|---|---|---|
| —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 46 | Aug. 12 |
| Improving multi-cylinder drying with screens and ventilation | p. 52 | May 20 |
| Innovations in machine clothing lead to improved water removal —James E. Smith | p. 38 | Jan. 22 |
| Inverform board machine at Sprague after six years experience —John C. W. Evans | p. 64 | Nov. 4 |
| Is there anything new in water removal at the presses and dryers? | p. 52 | Oct. 21 |
| Many points to be examined when purchasing or modifying presses —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 47 | Aug. 19 |
| New design—the Bunch Tube headbox flow concept —R. A. Bennett | p. 80 | Aug. 26 |
| New high intensity press design successful at Scott's Mobile mill —D. G. Burch | p. 72 | Nov. 4 |
| On-machine measurement of paper properties and characteristics. —Eric Hazlewood | p. 54 | Dec. 2 |
| Paper machine computer proving out at Kimberly-Clark mill —Robert A. Beachler | p. 30 | Dec. 30 |
| Pocket ventilation and applied fundamentals spell uniform drying —Thomas A. Gardner | p. 46 | Jan. 22 |
| Recent pressing and drying conference in retrospect —Gunnar Gavelin | p. 46 | Nov. 25 |
| Robertson obtains substantial benefits from new dry vat | p. 32 | Jan. 15 |
| Small diameter table rolls solve stock jump problems —B. L. Hamilton | p. 32 | April 22 |
| Solving paper machine wet end retention problems —J. R. Nelson | p. 41 | Dec. 16 |
| Studying dynamics of fourdrinier section using computer techniques E. L. Victory | p. 46 | June 24 |
| Suction drum or plain extractor press for cylinder machines? —W. P. Davis | p. 44 | June 17 |
| Water removal for academics and artisans is discussed at W.M.U. —Jeremy P. J. Edwards | p. 34 | Jan. 22 |
| What to consider when acquiring or modifying a dryer section —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 76 | Aug. 26 |
| Why has the fabric press failed to progress in this country? | p. 63 | Oct. 14 |

**Coating**

| | | |
|---|---|---|
| Cutter assists in new approach to finishing coated papers —H. Dickinson and M. Thomlinson | p. 41 | Sept. 2 |
| Great Northern is now a leader in lightweight coating. | p. 64 | May 13 |
| Hot melt coatings in folding carton manufacture —Samuel P. Savaso | p. 24 | Jan. 1 |
| How to get the most benefit from an off-machine beta gauge. —E. Hazlewood | p. 50 | July 8 |
| New coater at Iggesund mill is highly versatile | p. 82 | Feb. 19 |
| Newest coater design installed at pioneering paper coating company | p. 62 | March 11 |
| 19th Coating Conference held by TAPPI in Miami Beach. —Jeremy P. J. Edwards | p. 46 | May 27 |
| Overview of wax hot melt coating equipment —D. W. Robertson | p. 46 | June 17 |
| Trends and developments in binders for paper coatings —L. Georgevits and H. C. McCormick | p. 26 | Dec. 30 |
| Ultra-sonic mixing speeds color evaluation at Appleton Coating | p. 42 | June 3 |
| What's needed for the future in hot melt coating —William C. Simms, William J. Osiadacz, Kenneth G. Johnson, Frank J. McNamara and Loren J. Klitzke | p. 69 | Sept. 9 |
| What's new in coater designs at Beloit Corp. —Ralph P. Mahoney | p. 38 | June 17 |

**Converting operations**

| | | |
|---|---|---|
| Fiber box men hear of new records—in shipments not profits —John C. W. Evans | p. 74 | Nov. 4 |
| First International Conference on Electrophotography —Dr. David S. Most | p. 56 | Oct. 28 |
| Hot melt coatings in folding carton manufacture —Samuel P. Savaso | p. 24 | Jan. 1 |
| Hot melts-growth opportunity for adhesives in packaging | p. 61 | Nov. 11 |
| Laminator now uses prepared dry adhesive and continuous cooking —D. Allen and R. M. Hall | p. 42 | July 1 |
| New useful disposable—a paper/plastic beer bottle. —John C. W. Evans | p. 48 | Dec. 2 |
| Overview of wax hot melt coating equipment —D. W. Robertson | p. 46 | June 17 |
| Trends and developments in industrial paper bags —Anthony C. Diliberto | p. 44 | Dec. 16 |
| What's needed for the future in hot melt coating —William C. Simms, William J. Osiadacz, Kenneth G. Johnson, Frank J. McNamara and Loren J. Klitzke | p. 69 | Sept. 9 |

**Engineering**

| | | |
|---|---|---|
| Factors to consider before purchasing new fourdrinier auxiliaries —J. Mardon, L. D. Mardon, J. Acford, and R. E. Chamberlain | p. 66 | Oct. 7 |
| Flow losses in stock lines—A graphical simplification —Peter S. Riegel | p. 40 | July 1 |
| Hammermill makes wide use of Fiberglas reinforced plastic | p. 41 | June 17 |
| How contaminated condensate from | | |

| | | ISSUE |
|---|---|---|
| paper machine is automatically diverted —Ken Fox | p. 52 | Dec. 2 |
| How to buy or sell used equipment and save money —J. P. Epstein | p. 58 | Oct. 28 |
| How one paper mill is making more use of reinforced plastics —J. Shackleton | p. 37 | July 1 |
| How scale model played key role in new Scott Maritimes mill | p. 94 | June 10 |
| How to compute net positive suction head for centrifugal pumps —J. J. Paugh | p. 50 | March 25 |
| How to examine a paper machine reel ventilation system —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 68 | Sept. 16 |
| How to examine calender and reel designs and proposals —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p 64 | Sept. 9 |
| How to plan the design and acquisition of a paper machine. —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 36 | July 29 |
| How to reach decisions about new stock preparation equipment J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 52 | Sept. 23 |
| How to select A. C. motors for economy with capability —C. R. Olson and E. S. McKelvy | p. 68 | March 11 |
| How to select and specify a new fourdrinier section and components —J. Mardon, L. D. Mardon, J. Acford, R. E. Chamberlain | p. 46 | Aug. 12 |
| How to select the winder design that you need for your mill —J. Mardon, L. D. Mardon and J. Acford, R. E. Chamberlain | p. 43 | Sept. 2 |
| Is your drive motor correctly positioned on vibrating screens and feeders? —James Elder | p. 44 | July 15 |
| Many points to be examined when purchasing or modifying presses —J. Mardon, L. D. Mardon, J. Acford, R. E. Chamberlain | p. 47 | Aug. 19 |
| Monolithic tank linings speed construction at Brown's Berlin mill | p. 52 | June 24 |
| New flash drying system for pulp proven at Fiskeby —Janne Leffler | p. 36 | Dec. 16 |
| New Scott former further proven at Chester in second generation unit —John C. W. Evans | p. 22 | Dec. 30 |
| Package boilers are a growing trend in our industry but. . . . —T. D. Lipsey | p. 52 | April 1 |
| Paper mill should be designed for efficient material handling | p. 54 | Aug. 5 |
| Pulp flash dryer features high-consistency drum press —Harry Dyer | p. 59 | Nov. 11 |
| Teflon sleeves overcome size and coating initial drying problems | p. 61 | April 15 |
| What about instrumentation for a new paper machine? —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 48 | Sept. 30 |
| What to consider when acquiring or modifying a dryer section —J. Mardon, L. D. Mardon, J. Acford and R. E. Chamberlain | p. 76 | Aug. 26 |
| Why, What and How of steam plant instrumentation —W. W. Pruitt, J. B. Thomas | p. 46 | Sept. 2 |

**Finishing**

| | | |
|---|---|---|
| BCFP uses computer to print unique newsprint labels | p. 50 | Sept. 23 |
| Controlled moisture addition to moving webs by a roll system —C. C. Boggus and J. E. Taylor | p. 60 | Sept. 23 |
| Cutter assists in new approach to finishing coated papers —H. Dickinson and M. Thomlinson | p. 41 | Sept. 2 |
| Embosser at Moraine lowers cost and improves competitive position —Richard Dwyer | p. 35 | April 22 |
| How to care for and handle your filled rolls —Morton W. Johnson | p. 45 | Oct. 21 |
| How to select the winder design that you need for your mill —J. Mardon, L. D. Mardon, J. Acford, R. E. Chamberlain | p. 43 | Sept. 2 |
| Improving the service life of filled supercalender rolls —L. A. Moss | p. 68 | May 13 |
| Material handling trends in paper finishing and converting | p. 32 | Aug. 19 |
| New highly mechanized newsprint finishing system installed at Great Lakes | p. 45 | Aug. 12 |
| Price speeds newsprint carloading, cuts damage | p. 70 | Oct. 7 |
| Ream wrapping and cartoning is on an automated system —Jeremey P. J. Edwards | p. 54 | April 1 |
| Second Finishing and Calendering Conference scores modest gains —Harry Dyer | p. 36 | Nov. 25 |
| Versatile finishing room is the key to good customer service | p. 50 | Feb. 12 |

**Forecasts**

| | | |
|---|---|---|
| How big will we be in 1985 | p. 44 | Jan. 29 |
| How good are the capacity surveys for the paper industry —Robert S. Schultz | p. 70 | Sept. 16 |
| New capacity survey shows modest increases for 1969-1970. —John C. W. Evans | p. 42 | Nov. 25 |
| New paper capacity figure totals are in line with consumption —John C. W. Evans | p. 52 | March 4 |
| 1967—a year of pause for the Canadian industry —R. M. Fowler | p. 46 | Feb. 5 |
| Outlook at mid-68 indicates U. S. consumption will top 53 million tons —William A. Brehm | p. 43 | July 22 |

**Instrumentation**

| | | |
|---|---|---|
| Anticipator-computer system solves headbox control problem | p. 85 | Feb. 19 |
| Application of computer control | | |

| | | ISSUE |
|---|---|---|
| to kraft mill continuous digesters | p. 42 | Sept. 23 |
| Application of electronics can simplify stock blending —D. A. Hambleton | p. 72 | March 11 |
| Automated liquid effluent control system at Alabama kraft —W. E. Newton | p. 48 | July 22 |
| Automatic moisture control with the inframike on crepe wadding —G. Eastwood and D. Horner | p. 50 | April 8 |
| BCFP uses computer to print unique newsprint labels. | p. 50 | Sept. 23 |
| Color matching on machine can be made fully automatic —J. P. Gill | p. 55 | Sept. 23 |
| Considerations in centralizing control of the recovery cycle —Ralph K. Johnson | p. 39 | April 8 |
| Consistency control—a survey of the diverse methods in use —John R. Lavigne | p. 45 | Jan. 8 |
| Continuous measurement of quality on the paper machine —Eric Hazlewood | p. 48 | Nov. 25 |
| Drive and control distinguish Europe's largest newsprint machine —Leif Johansen and Vilmos Torok | p. 42 | April 1 |
| The cook's helper—a computer system for kraft batch digesters —R. L. Henderson | p. 42 | Jan. 8 |
| Dynamic moisture management with direct digital (DDC) computers —M. A. Keyes and J. A. Gudaz | p. 42 | Aug. 19 |
| Electronics eliminates errors and speed routine paper testing | p. 66 | Sept. 16 |
| Fluidics-new technology offers process and control advances —Neil C. Sher | p. 58 | March 4 |
| How to get the most benefit from an off-machine beta gauge —E. Hazlewood | p. 50 | July 8 |
| How contaminated condensate from paper machine is automatically diverted —Ken Fox | p. 52 | Dec. 2 |
| Improving weight uniformity by automatic beta gauge control —E. Hazlewood | p. 54 | July 15 |
| Instrument measures consistency in-line and with full flow —John R. Lavigne | p. 34 | Jan. 15 |
| Instrumentation and control for Glatfelter's pulp mill expansion —F. N. Carter | p. 36 | Dec. 23 |
| Instrumentation for chemi-mechanical and semi-chemical pulping —V. B. Bodenheimer and J. C. Witkowski | p. 47 | Dec. 9 |

**from the new DICTIONNAIRE PAPETIER**

**832 pages, 5½x7½ inches, hard leatherette binding—$20.**

Just published in France, here in one volume are four useful dictionaries that merit a place in the library of every pulp and paper maker, construction and engineering firm, and manufacturer of paper machinery and equipment. The first section quickly shows the English, German and Spanish equivalents for all the French words and terms used in the paper, pulp, converting and printing industries—also for related industries and sciences. Three additional sections, each on a different colored paper, give the English-French, German-French, and Spanish-French equivalents.

The editors have devoted many years to developing this, the most comprehensive multilanguage dictionary of the industry available anywhere today.

The price of the "Dictionnaire Papetier" is $20 a copy—and we pay the handling and surface postage when remittances accompany orders.
